Household devices and appliances eg. heating devices.

Revision and consolidation

!!!! ZADANIE : Write down heating devices which you can see in the pictures, please.

Wypisz urządzenia grzewcze, jakie widzisz na obrazkach.

Send your work till 14.05.2020 r. (Proszę przesać prace do 14.05.2020r.)

Household Devices and Appliances (1)

- **Air conditioner:** a device that cools and dries the air in one room or an entire home (central air conditioning).
- **Radiator:** heats a room when hot water passes through the device.
- **Thermostat / heat pump control panel:** a device used to set the temperature of an air conditioner, heater or heat pump.
- **Electric fan:** a device with metal or plastic blades that move in a circle and cools and circulates air.
- **Space heater:** a small electric device that is used to heat a single room or area of a large space.
- **Water heater:** a large tank that holds and heats the water used in the house.
- **Desk lamp:** a small lamp used to provide light to a particular area to make it easier to see what one's working on.
- **Flat screen television:** a television that has a flat screen.

- **Vacuum cleaner:** a machine used to clean floors, carpets and rugs by sucking up crumbs, dirt and other particles.
- **Iron:** uses heat and/or steam to press out wrinkles in clothing.
- **Washing machine:** cleans clothes and other materials with water and soap and then spins the water out so that they can dry more quickly.
- **Clothes dryer / dryer:** a machine that is used to dry and remove lint (small particles of cloth) from clothing.
- **Dish washer:** a machine that washes and dries dishes, glasses, silverware, pots and pans.
- **Stove and oven:** used to cook food using heat (either powered by electricity or gas).
- **Refrigerator & freezer:** an appliance that keeps food preserved with cold air. The refrigerator uses cool air and the freezer uses very cold air to freeze the food.
- **Deep fryer:** a machine that fries foods in very hot oil
